

交付物类型0 Deliverable Category 0	交付物类型1 Deliverable Category 1	交付物类型2 Deliverable Category 2	交付物名 Deliverable Name	交付物描述 Description	备注 Comments	供应商回复 The Supplier's feedback	"有条件同意交付"和"不同意交付"的备注 Comments in case of "conditionally agree" and "not agree"
源代码 Source Code	完整的软件源代码包 Complete software package			C/C++ file, ASM file, simulink model, m files, mat files, ARXML files, IDE project file or make files, AUTOSAR related files.	对应软件模块功能说明的内容		
	完整的软件源代码开发历史记录 Complete software source-code development history record			Complete software source-code development history records within the code management database			
文档 Document	应用层软件设计 ASW Software Design	System Requirement					
		Software Requirement					
		Software Architecture Design					
		Software Detail Design (for all SW modules)					
	底层软件设计 BSW Software Design	MCAL configurations instruction					
		BSW configurations instruction					
		BSW CDD design					
		BSW verification test plan					
		BSW verification test case					
	功能安全设计 Functional Safety Design	BSW verification test report					
		Item definition					
		Harzard analysis					
		Safety goal					
		FMEA design document					
		FTA design document					
		Functional safety requirement (FSR)					
		Technical safety requirement (TSR)					
		Software safety requirement (SSR)					
		Safety Analysis Reports					
		Safety verification test plan					
		Safety verification test case					
		Safety verification test report					
	软件测试与验证 Software Testing and Validation	Software Testing and Validation Requirement					
		Software Testing and Validation Plan					
		Static Software test and analysis.					
		Software unit test cases and report					
	软件标定 Software Calibration	Software Validation test cases and report					
		Software calibration design					
		Software calibration procedure and instructions					
		Calibration data management methods and document					
	项目管理 Project Management	A2L file auto generation tool and document		tool configuration files, user documents and data (A2L file) management.			
		Software Development Plan					
		Software Organization Chart					
		Software Configuration Management Plan & Report					
		Software Quality Assurance Plan & Report					
开发环境与工具链 Development environment and tool chain	编译/集成系统，文档 Integration build system and documents			Automatic or manual build system, user manual for sysetm configuration and operations.			
	DV/PV 测试方法，文档 DV and PV tetsing methods, documents			Test system design and usage documents, test cases and procedures. User manual.			
	开发环境与工具链 Development environment and tool chain			development /calibration / testing / measurement tools (instruments & devices) and process introduction, development V cycle sequence and work flow.
